THE VALENCIA DISASTER

The story of the wreck of the steamer Valencia near Klamath rock off the north Pacific coast reads terribly like the chronicles of maritime disasters of a half century and more ago. We who read it can form but the faintest mental picture of the agony that hacked the hearts of the unfortunates who waited, waited, waited in the rigging and on the decks of the breaking vessel for the death that was inevitable to nearly all of them.

Survivors are telling of the scenes and their accounts, hysterical and half-mad though they are, cannot fail to thrill with horror every heart that throbs with human sympathy. Though the disaster did not involve as great a loss of life as the first dispatches indicated—eighteen survivors were rescued from a raft Wednesday—more than a hundred persons perished.

Most pitiful are some of the individual cases. A child a boy 4 years old, saw his mother, father and sisters drowned. A husband, en route to Seattle from southern California, was powerless to save his wife and two daughters. A group of passengers, mostly women, were in what was thought to be the safest part of the rigging when it was washed away. The sea engulfed all of them before a hand could be stretched out to help.

That there is a providence that shapes our ends will always be believed by a man who was reported lost. His name appeared in the passenger list but later it developed that he had hurried to the steamer's dock in San Francisco only to find that the ship had sailed a few minutes before. Was this luck? No, it was providence.

As we read of the disaster we must realize how poor how feeble a thing is man when he pits his puny powers against the fearful forces at nature's command. We must realize that, in spite of the marvelous improvements that have been made in steamers within the memory of the generation that ocean travel is today the safest form of travel, those who go down to the sea in ships are still in danger from the perils of the deep. No human hand can stay the upraised hand of nature.
